# Rohit Jayaraj

9850002220 | rohit.jayaraj@gmail.com | Bengaluru, Karnataka

## Summary

Performance-driven Software Engineer with nearly 2 years of experience specializing in enterprise backend systems, integration middleware, and DevOps automation. Proven track record at a global IT consultancy managing high-concurrency architectures using C#, ASP.NET, VC++, and Oracle SQL. Adept at accelerating system migrations and automating CI/CD pipelines using GitHub Actions and Gitflow. Recognized for high-efficiency delivery, utilizing enterprise generative AI tools (Gemini CLI) to optimize application delivery and reduce manual development timelines by an estimated 15%.

## Experience

**CGI | Bengaluru, Karnataka**
**Software Engineer | 08/2024 - Present**

- **DevOps & CI/CD Migration:** Appointed to architect and implement version control strategy, branching guidelines (Gitflow), and automated CI/CD pipelines using **GitHub Actions** for a major enterprise application migration to a modern Java and React ecosystem.
- **Enterprise Middleware Integration:** Developed and maintained robust backend microservices utilizing **C# and ASP.NET**, orchestrating asynchronous messaging and secure routing of bulk XML financial payloads through **IBM MQ** integration channels.
- **Database Engineering:** Engineered optimized SQL scripts, data pipelines, and transactional schemas using **Oracle (sqldeveloper)** to manage high-volume data population and ensure relational integrity.
- **Legacy Systems Modernization:** Sustained and refactored core business logic within legacy **Visual C++** applications while driving phased components migrations into modern .NET environments.
- **AI-Augmented Productivity:** Integrated **Gemini CLI & Enterprise** tools into the development lifecycle, optimizing boilerplate generation, testing, and script translation to autonomously save over **8,200+ minutes** of manual engineering time.

**CodeClause | Bengaluru, Karnataka**
**Python Developer Intern | 09/2023 - 10/2023**
Developed Python codes for as per requirements. Collaborated with a remote team to enhance application functionality. Participated in code reviews and debugging sessions.

## Skills

C#, C++, Python, SQL, ASP.NET, .NET, IBM MQ, Oracle DB, sqldeveloper, MySQL, GitHub, Git, Subversion, Jenkins, Selenium, CI/CD, Gemini CLI, Prompt Engineering, AI Productivity Optimization

## Education

**Presidency University | Bengaluru, Karnataka**
**Computer Science**

## Projects

**Physics Simulator for Entities using Python - Mar 2020 - Jun 2020**

- Developed a simulation tool to model object motion in a virtual environment using Python.
- Implemented features to adjust gravity, elasticity, and other physical constraints.

**Kronos: Personal Assistant using Python -Aug 2023 - Present**

- Co-developed Kronos, a Python-based personal assistant.
- Integrated voice input functionality to assist with tasks like sending emails and locating current positions

## Languages

English, Malayalam, Kannada, German, Hindi
